

SSL Certificate – NetScreen

Installation Guide

Installation Instructions for NetScreen ScreenOS

Step 1. Obtain and Install the SSL Certificate

1. The Symantec certificate will be sent by email. The certificate is included as an attachment (Cert.cer) and it is also imbedded in the body of the email.
2. Copy and paste the certificate into a text file using Vi or Notepad

The text file should look like:

```
-----BEGIN CERTIFICATE-----
```

```
[encoded data]
```

```
-----END CERTIFICATE-----
```

Make sure there are 5 dashes to either side of the BEGIN CERTIFICATE and END CERTIFICATE and that no white space, extra line breaks or additional characters have been inadvertently added.

3. Save the file with extansion **SSL.crt**
4. From the Options menu, click **Objects**, and then click **Certificates**.
5. From the show dropdown select **Local**.
6. Click **Browse** to locate the **SSL.crt**
7. Click **Load**.

Step 2. Download and Install Intermediate CA Certificate

1. Download the Intermediate CA certificate from [here](#).
Select the appropriate Intermediate CA certificate for your SSL Certificate type.
2. Copy the Intermediate CA certificate and paste it on a Notepad.
3. Save the file as **intermediate.crt**
4. Open the **WebUI**
5. From the Options menu, click **Objects**, and then click **Certificates**.
6. From the show dropdown select **CA**.
7. Click **Browse** to locate the **intermediate.crt** saved on your local system.
8. Click **Load**.

Verify certificate installation using the [Symantec Installation Checker](#).
