

# SECTIGO WEB

A simplified web security solution to help safeguard your website from threats and vulnerabilities!

## What is it?

Sectigo Web Security is a comprehensive and powerful tool to secure your website.

Say goodbye to complexity and welcome simplicity in setting up 360-degree online protection for your website!

Enjoy an **all-in-one** and **comprehensive** web security product with all of the features below:

### WEB DETECT Detection & Monitoring

Comprehensive automated scans for any hidden web threats.

### WEB CLEAN Infection Removal

Automated malware removal.

### WEB BACKUP RESTORE Backup and Restore

Unlimited backups & one-click restore.

### WEB FIREWALL (WAF) Proactive Protection

Web Application Firewall blocks attacks.

### WEB PATCH Patching Vulnerabilities

Automated vulnerability patching.

### WEB DNS Ensure Website Uptime Globally

Premium Global Anycast DNS

### WEB ACCELERATE (CDN) Improved Performance

Global CDN with Lite DDoS protection.

### WEB COMPLY Payment Compliance

Automate, simplify and quickly attain PCI compliance.

## Why use Sectigo Web Security?

1

Protect your website and your customers from cyber attacks 24/7 365 days!

2

Automatically identify, patch, cleanse, block, and respond to all types of attacks and vulnerabilities on your websites without needing any deep cyber expertise.

3

Enjoy enterprise-grade protection at a fraction of the cost for powerful website defense using innovative next-gen technology.

4

Ensure a high level of customer trust and brand reputation to scale your website to the next level.

5

Accelerate your website's bottom line revenue growth and reduce website security maintenance expenses.

6

Enjoy an efficient and high quality customer support with 24/7 technical support email, chat and ticketing.

# WEB DETECT

Comprehensive automated scans for any hidden web threats.

- Sectigo Web Detect Enable a daily website scanner that automatically checks, finds and instantly notifies you of any hidden malware, viruses, and other critical security threats.
- It monitors your website and provides real-time automatic notifications of any security risks found via the comprehensive scanners.

## Highlights

### ACCURATE SCANS

Receive the most comprehensive protection in the industry with a database of 10M+ threats.

### WORKS INSTANTLY

Cloud-based technology deploys and protects your site in minutes.

### DETAILED REPORTS

Easy to understand reports to help you understand complex security issues in a quick and simple way.

## Why use Sectigo Web Detect?

- 1** It works with all popular content management systems (CMS):

- 2** It automatically detects vulnerabilities 24/7 365 days, and provides immediate, automated, real-time alerts and results.
- 3** Enjoy optimised outside-in (external) scanning that is fast and light weight.
- 4** It is easy to be configured to work with your website and its maintenance is simple.
- 5** It is able to fully integrate with all Sectigo SSL certificates.
- 6** Gain access to simplified reports with actions on how to fix any detected security flaws.

## Comprehensive Detection Features:

### MALWARE DETECTION

Monitor your website daily for security vulnerabilities found in the following content management systems (CMS): WordPress, Joomla!, Drupal, WooCommerce, Prestashop, and Magento.

### NETWORK PORT SCAN

Daily scans of your hosting environment to ensure it is secured properly. Automated alerts break down open ports and how they are being used.

### VULNERABILITY DETECTION

Enjoy daily scan which finds malware and links to potentially dangerous sites that could harm or damage your website or computer.

### XSS & SQL INJECTION SCAN

Monthly scans of your web hosting environment. Checks for vulnerabilities in operating systems and application versions.

### SPAM & BLACKLISTING MONITORING

Daily scans of your website's IP address and domain name against multiple leading spam databases. Alerts to "bad neighbor" blocks, a situation when your website shares an IP address with another domain sending spam on a shared hosting platform.

**Avoid** website downtime and data loss by performing continuous site health checks with an always-on website scanner that discovers any hidden threats.

## Summary:

NUMBER OF WEB PAGES	5	VULNERABILITY DETECTION	DAILY
MALWARE SCANS	DAILY	BLACKLIST MONITORING	DAILY
COMPREHENSIVE RISK ANALYSIS	DAILY	SPAM MONITORING	DAILY

# WEB PATCH

Automated vulnerability patching solution providing proactive protection.

- The daily scans automatically detect critical weaknesses found in websites content management system (CMS) or database, and proactively patches these vulnerabilities before cybercriminals can exploit them.
- Many websites run an outdated version of CMS and they are exploitable through significant security vulnerabilities.
- Sectigo Web Patch extracts the security fixes from new releases and backports them to all earlier versions.

## Highlights

### ACCURATE PATCHING

Receive the most comprehensive protection in the industry with a database of 10M+ threats.

### WORKS INSTANTLY

Cloud-based technology deploys and protects your site in minutes.

### DETAILED REPORTS

Easy to understand reports to help you understand complex security issues in a quick and simple way.

## Why use Sectigo Web Patch?

- 1** It works with all popular content management systems (CMS):

- 2** It automatically detects vulnerabilities 24/7 365 days and patches them.
- 3** Enjoy optimised outside-in (external) scanning that is fast and light weight.
- 4** It is easy to be configured to work with your website and its maintenance is simple.
- 5** It is able to fully integrate with all Sectigo SSL certificates.
- 6** Gain access to simplified reports with actions on how to fix any detected security flaws.

## Comprehensive Patching Features:

### CMS CORE FILE PATCHING

Automatic security patches are deployed when new CMS versions are released, allowing for complete full-version updates according to your schedule.  
Works for Wordpress, Joomla, Drupal

### AUTOMATED PLUGIN PATCHING

Outdated plugins are common entry points for attackers. Automatically patches the most popular WordPress plugins: Contact Form 7, Yoast SEO, Jetpack, All-in-one SEO Pack, TinyMCE, Google XML Sitemaps, WordPress Importer, and Easy WP SMTP.

### AUTOMATED ECOMMERCE PATCHING

Protect your ecommerce assets from cybercriminals by automatically patching security vulnerabilities found in leading ecommerce platforms including: WooCommerce, Magento, and Prestashop.

**Avoid** website downtime due to exploitation of outdated CMS core files, plugins and ecommerce platforms by attackers.

## Summary:

AUTOMATED CMS CORE PATCHING

# WEB CLEAN

24/7, 365 days of powerful and automated website cleaning, malware remediation and vulnerability platform patching solution.

- Sectigo Web Clean is the most comprehensive, automatic malware removal system available.
- It provides a full website analysis to find and automatically remove malicious files and code or any cyberthreats from your website.

## Highlights

### COMPLETE CLEANING

Receive the most comprehensive protection in the industry with a database of 10M+ threats.

### WORKS INSTANTLY

Cloud-based technology deploys and protects your site in minutes.

### DETAILED REPORTS

Easy to understand reports to help you understand complex security issues in a quick and simple way.

## Why use Sectigo Web Clean?

- 1** It works with all popular content management systems (CMS):

- 2** It automatically detects and removes malware 24/7 365 days.

- 3** Enjoy a comprehensive analysis of your website from the inside-out.

- 4** It removes backdoor files, bots and other malicious code.

- 5** Cloud-based and works continuously, with zero worries about additional load on your server.

## Comprehensive Cleaning Features:

### DAILY SCANS

Sectigo scans websites from the user's point of view (outside-in) to catch signs of malware before the visitor or search engines do.

### AUTOMATED DATABASE CLEANING

Automatically removes malware infections from popular database driven-websites such as WordPress, Joomla!, or any web applications using a MySQL database.

### AUTOMATIC MALWARE REMOVAL

Automatically remove malware with minimal action required from you, and without any downtime or disruption in your website's functionality.

### CUSTOMISED PROTECTION

Protection from unauthorized access through database and SEO SPAM with blacklist remediation to ensure optimised site uptime.

**Avoid** website downtime by implementing immediate remedy actions whenever your website is targeted by attackers.

# WEB DNS

Ensure uptime, to all your worldwide users, with global Anycast DNS featuring blazing fast resolutions, near real-time update propagation, and an enterprise security-first posture.

- Sectigo Web DNS reduces the problems of downtime and performance issues that might happen during the DNS resolving process, delivering the highest performance and minimising operational challenges.
- Sectigo's Anycast network infrastructure takes advantage of multiple geographically dispersed servers to reroute traffic from any PoPs when there are issues that impair performance.

## Highlights

### COMPREHENSIVE DNS SOLUTION

Receive the most comprehensive solution for DNS issues.

### WORKS INSTANTLY

Cloud-based technology works instantly.

### REAL-TIME PROPOGATION

Immediate DNS propagation to increase efficiency.

## Why use Sectigo Web DNS?

- 1 It works with all popular content management systems (CMS):

- 2 Enjoy speed boost and improved reliability for your website.

- 3 Near real-time propagation with network-wide DDoS protection for your website's guaranteed 100% uptime, as well as automated scaling for it.

- 4 Redundancy and optimisation with infinite routing options for your website to be reachable.

## Comprehensive DNS Features:

### SMART ROUTING

Customised network and computing hardware within every Point of Presence (PoP) will automatically route to the most optimal DNS server at lightning speeds.

### LOAD BALANCING AND FAILOVER

Enjoy failover and disaster recovery by rerouting traffic if your network infrastructure fails during a disaster. You get intelligent traffic management and seamless handoffs to minimise, if not eliminate, bottlenecks and any downtime.

### DDOS PROTECTION

Built in security hardened by platform wide security protects all Sectigo Web services by default from Level 3 through 5 DDoS attacks.

### IPV6 SUPPORT

Sectigo Web DNS provides IPv6-compliant Recursive DNS for your website.

**Sectigo Web Anycast DNS** is your ticket for speed and reliability! Maximize the speed, minimize downtime and provide the highest possible SLA for each of your website's global location. Have full redundancy and reliability without compromising.

## Summary:

NUMBER OF DNS ZONES COVERED	1	DMARC RECORD	SUPPORTED
GLOBAL ANYCAST NETWORK	YES	SPF RECORD	SUPPORTED
UNLIMITED DNS ZONES	YES	ANALYTICS	INCLUDED
UNLIMITED DNS RECORDS	YES	SLA	99.99%
NETWORK LAYER DDOS PROTECTION	YES	# OF QUERIES / MONTH	1 MILLION
DKIM RECORD	SUPPORTED		

# WEB BACKUP

Daily backups and one-click restore allow to never lose data again when solving any website emergency.

- Sectigo Web Backup is a fast, automated and reliable incremental agent-less offsite backup solution to help you one-click restore your website in case of website crashes.
- Enjoy various user options such as automatically scheduled backup and restore or selectively restoring certain files and folders. Gain control, flexibility and reliability with 256-bit encryption.

## Highlights

### BUILT-IN PROTECTION

Advance security, using 256-bit AES encryption to protect your files and database.

### EASY INTEGRATION

Cloud-based technology offers multiple options to automatically backup files and databases for your website.

### DETAILED REPORTS

Easy to understand reports to help you track initial and daily backups - quick and easy.

## Why use Sectigo Web Backup?

- 1 It works with all popular content management systems (CMS):

- 2 Zero installation needed - done via Secure FTP.

- 3 Enjoy peace of mind, knowing you are able to one-click restore a clean working version of your website files.

- 4 Incremental backups to minimise disk space usage, server costs and backup time.

- 5 Added security with independent offsite backups.

## Comprehensive Backup and Restore Features:

### FILE CHANGE ALERT MONITORING

Monitors backed up websites for changes daily and proactively alerts you to any additions, deletions or changes to help identify unauthorised or unintentional changes.

### RELIABILITY

Automatically detects databases for popular CMS to connect and create backups. Manual configuration is available for any other databases if there are connection credentials and information.

### BUILT-IN SECURITY

Stores backups on Amazon S3 for rock solid reliability and durability, protected with AES-256 server-side encryption.

### ONE-CLICK DOWNLOAD & RESTORE

Mistakes happen. One-click restore saves you time and trouble by getting your website back to where it was before the issue occurred.

**Reduce** your website downtime significantly by performing quick restore to the working version whenever your website faces serious issues, such as code error, hacker attacks or server error.

## Summary:

NUMBER OF WEBSITES	1	FILE CHANGE MONITORING	YES
BACKUP STORAGE LIMIT	1GB	NUMBER OF RESTORES	UNLIMITED
AUTO BACKUP	DAILY	NUMBER OF DATABASE COVERED	UNLIMITED

# WEB ACCELERATE

Secure and speed up how your website delivers content with an intelligent network of global servers delivering content at lightning speed.

- Sectigo Web Accelerate improves your website speed by more than 60% and reduces bandwidth by 40%-70% on average through CDN.
- The CDN comes with instant purge, real-time analysis, intelligent caching and built-in DDoS protection.
- Security, speed and simplicity in one solution:  
45 Edge Locations, 65Tbps Total Throughput, 2600+ Peering Partners, 28,000+ Global ASNs

## Highlights

### BUILT-IN PROTECTION

30+ global PoPs, analyse updated threat intelligence, blocking attacks no matter where they begin.

### EASY INTEGRATION

Cloud-based technology quickly deploys and improves performance for your CMS website.

### DETAILED REPORTS

Easy to understand reports to help you understand complex traffic patterns - quick and simple.

## Why use Sectigo Web Accelerate?

- 1** It works with all popular content management systems (CMS):

- 2** It increases your website's speed by 50% on average.

- 3** Enjoy static content caching, which uses 40-70% less bandwidth.

- 4** It fully secures end-to-end encryption for SSL.

- 5** Serve high volumes of traffic with zero lag time, which improves SEO ranking.

## Comprehensive Accelerate Features:

### INTELLIGENT AND CUSTOMISED CACHING

Intelligent caching policies keep most recently and frequently requested content available at the edge longer. You can also finetune how, how long, and even where content is stored.

### LITE DDOS PROTECTION

Enjoy a complete Layer 3-4 DDoS Protection to mitigate any attempts to overwhelm your server with a large volume of traffic, which causes your server to be overloaded and unavailable.

### INSTANT PURGE

Remove content from the cache worldwide at the push of a button - deleting your content from the CDN is immediately completed and it is no longer served via Sectigo anywhere.

### IMPROVED SEO (TTFB)

Time to First Byte is the time it takes for a visitor to receive the first byte from a web server when requesting a URL. TTFB is critical for your website's SEO as it is the key speed metric used to rank sites competitively. Sectigo Web Accelerate constantly monitors usage patterns and minimises your TTFB through its intelligent caching technology.

**Accelerate** your website load speed greatly with intelligent caching to reduce load time significantly and improve your website's SEO.

## Summary:

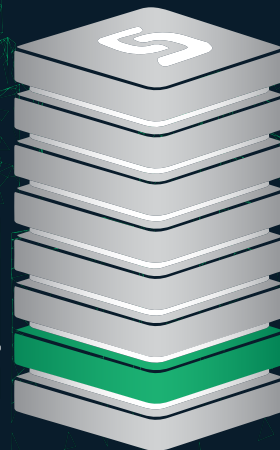

GLOBAL ANYCAST CONTENT DELIVERY NETWORK (CDN)	YES	SSL TRAFFIC METERING	UNLIMITED
BANDWIDTH USAGE / MONTH	100GB	DDOS PROTECTION (LAYER 3, 4)	YES
NUMBER OF SITES	1	CACHE POLICIES HANDLING	USER CONTROLLED
DYNAMIC AND STATIC CONTENT HANDLING	YES	HTTP/2 SUPPORT CONTENT	UNLIMITED
POPS INCLUDED	45	IPV6 SUPPORT	YES
PRIVATE SSL	YES	ANALYTICS	YES
UPLOAD CUSTOM SSL	YES		

# WEB FIREWALL

Protect your websites, applications, APIs and more with a proactive security measure against the Internet's worst attacks, infections, vulnerabilities and threats worldwide.

- **Web Firewall** Sectigo Web protects your websites and web applications from cyberthreats and harmful traffic, like cybercriminals, bad bots and DDoS attacks.
- It evaluates your website's traffic and only allows good traffic to enter your site, such as customers and search engines, while blocking the bad traffic, like spam bots and hackers. Every attack is analyzed and profiled to make the firewall smarter and more secure from emerging threats.

## Highlights

### COMPREHENSIVE PROTECTION

Receive the most comprehensive protection in the industry with a database of 10M+ threats.

### WORKS INSTANTLY

Cloud-based technology deploys and protects your site in minutes.

### DETAILED REPORTS

Easy to understand reports to help you understand complex security issues in a quick and simple way.

## Why use Sectigo Web Firewall?

- 1 It works with all popular content management systems (CMS):

- 2 It blocks targeted attacks on your website.
- 3 It prevents search engine blacklisting, zero-day exploits and other website threats.
- 4 It fully secures end-to-end encryption for SSL.
- 5 Serve high volumes of traffic with zero lag time, which improves SEO ranking.
- 6 It simplifies PCI Compliance for your website.

## Comprehensive Firewall Features:

### OWASP TOP TEN PROTECTION

Protect your website against the top ten security threats identified by the Open Web Application Security Project by default. Continually monitors the threat landscape and updates the WAF with the latest threat data, so you don't have to.

### BAD BOT PROTECTION

State-of-the-art detection technologies to identify bot traffic using bot behavioural analysis and IP reputation, including device fingerprinting. Protects your website against automated traffic at a high level of precision and control by differentiating legitimate visitors and automated malicious visitors.

### BACKDOOR ACCESS PROTECTION

Prevents online bad actors' continuous attempts to take control of your website by identifying backdoor files and blocking an attacker's access to them, giving control back to you.

### BRAND REPUTATION MONITORING

Sectigo Web Firewall blocks attacks seeking to exploit the OWASP Top 10. It includes protection for your website's brand reputation, prevent search engine blacklisting and providing a safe customer experience.

**Keep** your websites and applications safe from malicious activities and maintain a clean website, protect against attacks and ensure uptime.

## Summary:

WEB APPLICATION FIREWALL (WAF)	YES	OWASP TOP TEN PROTECTION	YES
WAF REQUESTS / MONTH	1 M	INTEGRATED OWASP AND CMS POLICIES	YES
CUSTOM RULES	5	UPTIME SLA	99.99%
DDOS PROTECTION (LAYER 7)	YES	ORIGIN SHIELD	YES

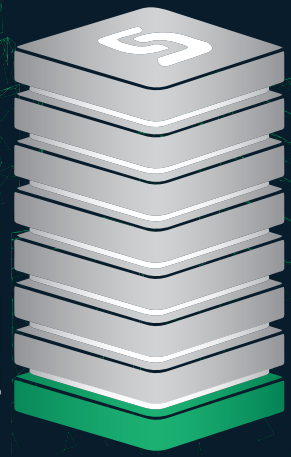

# Web COMPLY

Automate, simplify and quickly attain PCI compliance using a scalable and non-disruptive solution.

- Protect your customers' online transactions with automated and simplified process of PCI compliance quickly by eliminating threats and securing network with scans and remediation solution.

## Highlights

### COMPREHENSIVE PROTECTION

Receive the most comprehensive protection in the industry with a database of 10M+ threats.

### WORKS INSTANTLY

Cloud-based technology deploys and protects your site in minutes.

### DETAILED REPORTS

Self Managed PCI Scan Portal provides fast & secure scan report identifying and recommending fixes.

## Why use Sectigo Web Comply?

- 1 It works with all popular content management systems (CMS):

- 2 Enjoy unlimited PCI scans for your website.
- 3 Easy PCI compliance process with less false positives, global scalability and remediation instructions.
- 4 Great convenience with full reporting capabilities and a centralised management.
- 5 Scheduled scans which are disruptive free to monitor your website for non PCI-compliance issues.

## Comprehensive PCI Compliance Features:

### GUIDED APPROACH

Convenient guidance to help you through your website's PCI-compliance with tips and a friendly intuitive interface.

### SCANNING AND REMEDIATION

High accuracy scanning for all your Internet-facing networks and systems, which generates easy to use reports and provides detailed patching instructions for each vulnerability discovered.

### FLEXIBLE SCANNING BANDWIDTH

You can decide the scanning speed – fast, average or slow – based on how much load you want on your website.

### AUTOMATED & EASY TO USE REPORTS

You can use a self-managed PCI scan portal which provides fast & secure scan reports, helping you to identify and recommend fixes for any security vulnerabilities to reduce your risks.

**Stay** one step ahead of PCI Compliance and minimise your resources and efforts needed to make your website PCI DSS compliant with a complete and streamlined portal.

## Summary:

NUMBER OF IPS FOR SCAN	5
PCI SCANS PER QUARTER	UNLIMITED
ASV SCAN REPORT INCLUDED	YES
PURCHASE ADDITIONAL IPS	YES
