DigiCert Smart Site Seal Enabling Process

Smart Seal

The DigiCert Smart Seal is available to customers that purchase or are an existing [Secure Site](#) or [Secure Site Pro](#) certificate.

When users hover over the DigiCert Smart Seal, additional security information will be magnified. When clicked on, the seal will produce a splash page with details including:

- Company name
- Address/location
- Date issued
- Level of encryption

New details will be added to the splash page as they are developed, including:

- Verified customer since: (date)
- CT logs used
- Blocklist check
- Vulnerability scanned
- PCI compliance scan
- Verified logo (VMC)

How to enable DigiCert's Smart Site Seal

Step 1: Log into your CertCentral account

Step 2: Click on “Orders” and search the domain you wish to enable the site seal, under “Common name”

Step 3: Click on the Order # that is tied to the Common name

The screenshot shows the DigiCert CertCentral Enterprise interface. The sidebar on the left has the 'Orders' menu item highlighted. The main content area shows the 'Orders' page with search filters. The 'Common name' filter is set to 'bonkatsu.net'. The table below shows several orders, with the order # 135945982 and its common name 'bonkatsu.net' highlighted.

Order #	Common name	Product	Status	Order date	Certificate start date	Certificate expiration	Order expiration
1389 9270 Quick View	dave1.bonkatsu.net	Secure Site Pro SSL 1 year	Issued	04 Jun 2021	04 Jun 2021	02 Jul 2021	08 Jun 2022
1387 4743 Quick View	dave.bonkatsu.net	Secure Site Pro SSL 1 year	Issued	03 Jun 2021	03 Jun 2021	02 Jul 2021	07 Jun 2022
135945982 Quick View	bonkatsu.net	Secure Site Pro SSL 1 year	Issued	21 May 2021	21 May 2021	19 Jun 2021	25 May 2022

How to enable DigiCert's Smart Site Seal

Step 4: Select “DigiCert seal”

Step 5: Choose desired size of the logo

The screenshot displays the DigiCert CERTCENTRAL Enterprise interface for configuring a Site Seal. The page title is "Site Seal" and the order number is "Order #135945982".

Select a seal image: Two options are available: "Norton seal" (powered by digiCert) and "DigiCert seal". The "DigiCert seal" option is selected and highlighted with a red box.

Configure the seal: A section titled "Configure the seal" provides instructions: "Use the preview feature above to review site seal sizes and animation feature changes before applying them to the site seal your website." Under the "Size" heading, there are three radio button options: "Small", "Medium", and "Large". The "Large" option is selected and highlighted with a red box. A red arrow points from the "DigiCert seal" option in the previous section to the "Large" size option.

Preview: A preview window shows the selected "DigiCert seal" with the date "09/06/2021". Below the preview are "Cancel" and "Save configuration" buttons.

Animation: A section titled "Animation" provides instructions: "Use the preview feature above to view animation changes before applying them to your website." There is a "Hover" checkbox which is checked and labeled "Enable". Below this is the text: "Add a hover-over effect to the site seal * When visitors hover on the seal it".

How to enable DigiCert's Smart Site Seal

Step 6: Tick “Enable” for Hover and Autoplay.

*Note: If you wish to have your company logo displayed in the seal animation, click “Enable” for logo and “upload logo”. **Recommended!***

*Specifications for logo:
50*50 pixel canvas with a white background*

Size

Choose a seal size

Small
 Medium
 Large

Animation

Use the preview feature above to view animation changes before applying them to your website.

Hover

Enable

Add a hover-over effect to the site seal.* When visitors hover on the seal, it magnifies and displays additional data.

*Note: If you modify the site seal hover effect after you've installed the site seal code on your website, you must reinstall the code for those changes to take effect.

Autoplay

Enable

Animate the site seal.* When visitors come to your site, the seal will slowly evolve between the seal and the additional details.

*Note: Hover effect is required to animate the site seal.

Logo

Enable

Include your company logo in the site seal hover effect.* When visitors hover on the seal, your logo appears with the additional details.

*Note: DigiCert must approve your company logo before it appears in the site seal on your website.

Before uploading your logo, make sure it meets these requirements:

- File format must be SVG Tiny Portable/Secure file. [Learn how to render this file type.](#)
- The image should have a square aspect ratio (1:1).
- Center the image. This way, it optimally displays in a circle, a square, or a rounded square.
- Use non-transparent backgrounds.

Upload logo

How to enable DigiCert's Smart Site Seal

Step 7: Tick on the features you wish to enable. *Recommend to enable all.*

Step 8: Click “Save configuration.

If there is any problems with the process, please contact your account manager.
